Key Features

6.5" (16.5 cm) 2-Way Multi Fit Speaker

Polypropylene Injection Cone

Polypropylene provides a sophisticated appearance that is matched by its refined performance. This diaphragm greatly contributes to clear music reproduction, yet is rugged enough to resist the harsh elements associated with cars.

High Linearity Suspension Maintains Tight Control

To bring out the wide dynamic range of digital sources, a damper needs to be strong and resilient. Polyamide fiber has precisely these characteristics, helping to assure lively, yet accurate musical reproduction. This high-performance suspension maintains tight control throughout rapid sequences of strong transients, and faithfully tracks the rising edge of difficult-to-handle waveforms.

Type	2-way
Size	6 1/2"
Peak Input Power	160W
Frequency Range	35Hz - 22kHz
Sensitivity (S.P.L.)	92dB/W/m
Nominal Impedance	4 ohms
Mounting Depth	1.661"
Magnet Weight	5.4 oz
Typical Mounting Location	Rear door & rear deck
<u>Foamed Rubber Edge</u>	Yes
Cone Material	High rigidity polypropylene injection cone
European Standard Frame Dimensions	Yes
